

## Key Benefits:

- Your security environment at a glance.
- State-of-the-art IT security analysis.
- Zero impact on the performance of your IT security infrastructure.
- Minimal effort – maximum IT security transparency.

## ITC Watchmen – standing guard over your IT security

Say goodbye to the painstaking task of meticulously gathering security relevant data. Watchmen provides you with your own personalized security dashboard that you can tailor to meet your needs. It's intuitively designed, which means no time-consuming, costly training sessions required.

**Watchmen powered by ITConcepts** enables you to detect changes to your security infrastructure within seconds, offering maximum transparency for your security architecture with minimal effort.

Get a clear picture of how secure your business is with the help of graphics and charts, and an interface that can be individually customized.

## ITC Watchmen – always on top of your IT security

Gain an insight into your security data using pre-defined displays, or browse through your business's relevant security information as and when required. The standard version of Watchmen comes with over 20 KPIs, which can be monitored and displayed. You can either opt to use our standard set-up or, with our help, simply adjust the display to your own specifications.

**KPIs have already been defined for the following security products:**

- Firewall
- Proxy
- Antivirus
- Email
- DNS
